## **Nova Mesa Computer Systems to Give Away Netbook Computers with “Back to School” Essay Contest**

Arizona Students Can Win One of Three Netbook Bundles

**Phoenix, Ariz. – Aug. 3, 2009** – Nova Mesa Computer Systems, Inc., a Phoenix, Ariz.-based manufacturer and retailer of custom desktop, laptop, home theater and specialized gaming computers for the home, home office and business markets, announced today it will give away three Netbook computer bundles as part of its first “Back to School” essay contest. The contest begins today and runs through Sept. 6, 2009 with winners announced by Sept. 21, 2009.

The contest requires the submission of a 150-200 word essay and is open to Arizona students in grades 1-12. To enter students must visit [www.novamesa.com](http://www.novamesa.com).

“Back when we were students we didn’t have home computers let alone laptops and netbooks, so we thought it would be fun to see what today’s generation of students would do with all this cool new technology,” said Matt Bullock, president and founder of Nova Mesa Computer Systems. “Additionally, education and community support are core values at Nova Mesa so this giveaway fits in nicely with our company vision.”

The short essay question students must answer is: “How would you use a new Nova Mesa Computer Systems netbook bundle to help you do better in school during the new school year?” The contest also asks for feedback on how a new netbook bundle can help students experience the world of technology, with requested examples on how students would have fun with the bundle. One winner will be selected from each of three grade-level categories as follows:

- Grades 1-5. A Nova Mesa netbook and Logitech V150 laser wired mouse
- Grades 6-8. A Nova Mesa netbook, a Logitech V150 laser wired mouse and Cyber Acoustics stereo speakers with subwoofer
- Grades 9-12. A Nova Mesa netbook, a Logitech V150 laser wired mouse, Cyber Acoustics stereo speakers with subwoofer and Microsoft Office Home and Student Edition

Essays will be judged on creativity, details on how the student will use the bundle and examples of ways the student will have fun with the technology. One submission per student. Official contest rules, regulations and restrictions are available online at [www.novamesa.com](http://www.novamesa.com).
